# UNIT 2: FAMILY LIFE

## SPEAKING

### Read the sample

I should do a number of actions to improve the environment. First, I should start by using less energy inside of my house. For instance, I must unplug all of the electrical devices when not in use. Second, I ought to utilize organic products because they're excellent for the environment as well as my health. Finally, I should refrain from using anything made of plastic. We should use as little plastic as possible because it takes a long time for plastic to decompose.
