The screenshot shows a presentation slide with a light orange background. On the left, the title "Carbon footprint" is written in bold black text, followed by "(n)" and the phonetic transcription "/,kɑːr.bən ˈfʊt.prɪnt/". Below this is a green circular icon of a globe with a white footprint and the text "CO₂". To the right, a white box with a drop shadow contains the definition: "the amount of carbon dioxide (CO₂) produced by the activities of a person or an organisation". Below the definition is an example: "Ex: We have partnered with nearby farms, hoping to reduce the carbon footprint of our delivery trucks." On the right side of the slide, there is a vertical navigation bar with a hamburger menu icon.

Audio:

So this might sound really abstract, so listen carefully. Whenever someone or some factories do something, for example produce products, they will discharge some kind of wastes, and they affect to the environment, so we call that they leave a carbon – footprint on the environment, is it clear? Now repeat, “carbon – footprint”, remember it’s a noun. Read through the example
